

College of Agricultural and Life Sciences

School of Natural Resources and Environment

Karen & Environmental Science student, Maegan

Hello Environmental Science and Interdisciplinary Ecology students and prospective Gators!

In our School of Natural Resources and Environment we work with Environmental Science majors and minors. We offer a Bachelor of Arts and a Bachelor of Science degree, as well as a Masters and Doctoral degree in Interdisciplinary Ecology.

I work with students as an adviser to undergraduate students, and work with our Director in helping our graduate students to be successful.

I grew up in the state of NY and have a Bachelor of Science degree in Forest Biology from the State University of New York College of Environmental Science and Forestry at Syracuse. I have a MS.Ed. in College Student Development from Alfred University.

I have been fortunate to work at UF in a few departments and colleges over the years. I worked as the Broward Residence Director in the late 1980's/early 1990s; served as a Coordinator in Gator Engineering's Student Affairs Office; and presently am an Adviser in the School of Natural Resources and Environment in CALS.

My suggestions to you as students: to make the most out of your time while at the university. Explore different types of classes and organizations. Get to know other people. Look at ways to build your communication, organizational, and leadership skill sets. Consider going on a study abroad trip. Investigate internships and/or laboratory experiences. Make use of the programs, services, staff, and faculty resources that are available to you.

I look forward to meeting and working with you in our school. Please contact me at kbray@ufl.edu or by calling our school at 352-392-9230.

Thank you and best regards.

Go Gators!
