# STA 6093 Introduction to Applied Statistics for Agricultural and Life Sciences (3 credits)

Fall 2021

Time and Location: Online

# \*\*THIS COURSE USES THE PROGRAMMING LANGUAGE R EXCLUSIVELY. YOU <u>DO NOT</u> NEED TO KNOW R COMING INTO THE COURSE, BUT YOU WILL KNOW IT WHEN YOU ARE FINISHED\*\*\*

#### Instructors:

Denis Valle, 408 McCarty Hall C, 352-392-3806, <u>drvalle@ufl.edu</u> Ben Baiser, Building 116 Mowry Dr., 352-392-1947, bbaiser@ufl.edu

#### **Teaching Assistants**

Head TA: Tina Jackson (t.jackson@ufl.edu)

Grading TA: Lauren Trotta (lbtrotta@ufl.edu)

Online Office hours: Dr. Valle: Thursday 12:00-1:00 pm

TA, Tina Jackson: Thursday 5:00-6:00 pm

Date and location of final exam: All final exams will be on Monday, Dec. 13<sup>TH</sup>, 2021.

- Gainesville on-campus students (class number 21288 / section 109F) and students at RECs (class number 21287 / section 109D) will take the final exam in-person in a computer lab in UF's Gainesville campus, located in the Computer Science department (room CSE E231). There will be 2 available sessions: 8:30 am 11:30 am or 12:00 pm 3:00 pm.
- Students in class number 21286 / section 1098 will take the final exam online through HonorLock.

#### **Course Description:**

This course provides students with a conceptual and practical understanding of the application of statistics in the agricultural and life sciences. This is an **online course** that will use a combination of lectures, programming demonstrations, data exercises **using the programming language R**, group discussions, and primary literature to teach introductory statistics at the graduate level. **This course is NOT a "go at your own pace" course. Each module must be completed in a specific week (see Course learning objectives and weekly schedule below).** 

# Course goals:

- 1) Learn the programming language R
- 2) Familiarize students with the foundations of statistical analysis
- 3) Teach students basic statistical analysis and data management
- 4) Prepare students for advanced statistics courses they will take throughout their graduate career

# **Course learning objectives:**

| Week | Module                       | Module Learning objectives   |  |  |  |
|------|------------------------------|--|--|--|--|
| 1    | 1. Broad                     |  |  |  |  |
|      | overview of statistics       | <ul> <li>Describe the role of statistics in applied science.</li> <li>Identify the difference between a sample and the population.</li> </ul>      |  |  |  |
|      |                              | <ul> <li>Describe observational studies and its weaknesses<br/>and strengths.</li> <li>Describe experimental studies and its weaknesses</li> </ul> |  |  |  |
|      |                              | and strengths.   |  |  |  |
| 2    | 2. Reproducible              | Describe the advantages of using a scripting   |  |  |  |
|      | science / R                  | computer language for statistical analysis.  |  |  |  |
|      |                              | Define reproducible science.   |  |  |  |
|      |                              | Download R and R studio.   |  |  |  |
|      |                              | Know how to import and export data in R.   |  |  |  |
| 3    | 3. Knowing your data and     | <ul> <li>Describe the importance of querying and<br/>visualizing data.</li> </ul>  |  |  |  |
|      | Summary                      | Be able to query and summarize data.   |  |  |  |
|      | Statistics                   | <ul> <li>Calculate and understand the meaning of summary<br/>statistics (measures of location and spread).</li> </ul>                              |  |  |  |
| 4    | 4. Visualizing               | Utilize graphical techniques to visualize your data  |  |  |  |
|      | your data and                | Identify outliers using graphical techniques   |  |  |  |
|      | graphing your results        | <ul> <li>Create effective and innovative graphical displays<br/>of results</li> </ul>  |  |  |  |
| 5    | 5. Random variables and      | Define what is a probability and a probability distribution  |  |  |  |
|      | probability<br>distributions | Describe the characteristics of the normal distribution.   |  |  |  |
|      | นเรนามนนอกร                  | Explain why the normal distribution is so important  |  |  |  |
| 6    | 6. Hypothesis testing        | Define and develop a null hypothesis   |  |  |  |
|      |                              | Define and develop alternative hypothesis.   |  |  |  |
|      |                              | Identify when a result is "statistically significant".   |  |  |  |
|      |                              | Define precisely what a p-value is and how it is   |  |  |  |
|      |                              | computed to reach the conclusion that a  |  |  |  |
|      |                              | difference is not due to chance.   |  |  |  |
|      |                              | Identify Type 1 error  |  |  |  |
|      |                              | Identify Type 2 error  |  |  |  |
| 7    | 8. Linear                    | Mathematically define a linear model.  |  |  |  |
|      | models                       | Describe the four assumptions of linear models.  |  |  |  |
|      |                              | Conduct diagnostic tests for assumptions.  |  |  |  |
|      |                              | <ul> <li>Transform data to meet the assumptions of linear<br/>models</li> </ul>  |  |  |  |
|      |                              | Recognize the limitations of data transformations.   |  |  |  |

| 8  | 7. T-tests              | Know when a t-test is appropriate and which type     of t test to use (o.g. paired two sample, one) |  |  |  |
|----|-------------------------|---|--|--|--|
|    |                         | of t-test to use (e.g., paired, two sample, one sample t-tests).                                    |  |  |  |
|    |                         | Apply a t-test to data.   |  |  |  |
|    |                         | Understand the problems associated with multiple  |  |  |  |
|    |                         | statistical testing.  |  |  |  |
| 9  | 9. ANOVA                | Identify the types of data and experiments that an  |  |  |  |
|    |                         | ANOVA is appropriate for.   |  |  |  |
|    |                         | Run an ANOVA in R   |  |  |  |
|    |                         | Calculate an F-statistic.   |  |  |  |
|    |                         | Test hypothesis with ANOVA  |  |  |  |
|    |                         | <ul> <li>Interpret an ANOVA table and report ANOVA</li> </ul>                                       |  |  |  |
|    |                         | statistics.   |  |  |  |
|    |                         | Graphically display ANOVA results   |  |  |  |
|    |                         |   |  |  |  |
| 10 | 10. Simple              | Know when regressions are appropriate   |  |  |  |
|    | regression              | Run a regression in R   |  |  |  |
|    |                         | Be able to interpret and report regression  |  |  |  |
|    |                         | outcomes.   |  |  |  |
| 11 | 11 Multiple             | Graphically display regression results  |  |  |  |
| 11 | 11. Multiple regression | Identify the types of data and experiments that   |  |  |  |
|    | regression              | multiple regression is appropriate for.   |  |  |  |
|    |                         | Run a multiple regression in R  |  |  |  |
|    |                         | Detect multicollinearity among variables in   |  |  |  |
|    |                         | multiple regression.  |  |  |  |
|    |                         | <ul> <li>Interpret and graphically display interaction terms</li> </ul>                             |  |  |  |
|    |                         | in multiple regression and ANOVA.   |  |  |  |
|    |                         | Define AIC scores.  |  |  |  |
|    |                         | Select models using stepwise procedures in R.   |  |  |  |
| 12 | 12. Categorical         | Identify the types of data and experiments that   |  |  |  |
|    | data analysis           | categorical data analysis is appropriate for.   |  |  |  |
|    |                         | <ul> <li>Construct and interpret a contingency table.</li> </ul>                                    |  |  |  |
|    |                         | Calculate and interpret a chi-square statistic.   |  |  |  |
|    |                         | Constitution process on square statistics   |  |  |  |
| 13 | 13. Monte Carlo         | Be able to conceptualize appropriate null   |  |  |  |
|    | tests                   | hypothesis and test statistics for different  |  |  |  |
|    |                         | problems  |  |  |  |
|    |                         | Be able to implement simple Monte Carlo tests      Had a standard and a second for the Carlo tests  |  |  |  |
|    |                         | Understand the pros and cons of Monte Carlo tests   |  |  |  |
| 14 | 14. Future              | Select the appropriate analyses for a given data .  |  |  |  |
|    | classes/analyses        | type.   |  |  |  |
|    |                         | Know future options for quantitative topics and   |  |  |  |
|    |                         | courses.  |  |  |  |
|    | Einel                   |   |  |  |  |
| L  | Final exam              |   |  |  |  |

#### **Assignment Types:**

There are 4 types of graded assignments in this course:

- 1) Activities: These are assignments individual or group activities that build on a modules content. They often involve finding and interpreting outside resources (e.g., popular science articles, scientific articles). These assignments are present in select modules and thus are not due every week. When a module does have an activity, it will be due on Sunday at 11:55pm (i.e., the end of the week's module)
- 2) Conceptual Quizzes: These quizzes cover the basic concepts learned in each module and are open from Monday at 1:00 am to Sunday at 11:55pm each week. Once you begin the conceptual quiz, you have 1 hour to complete it.
- 3) Data Quizzes: In the data quizzes, you will analyze data in R using the analyses you learned in each module. The data quizzes are open from Monday at 1:00 am to Sunday at 11:55pm each week. Once you begin the data quiz, you have 3 hours to complete it.
- 4) Discussion board: We expect students to engage and provide meaningful contributions (posting questions, answers, or additional resources) to the weekly discussion boards. Participation in the discussion board will be factored into grading when students are on the cusp of a letter grade (e.g., B+). Thus, the discussion board is an opportunity for you to help yourself but will not count against you in any way.

# **Due Dates for Assignments:**

| Assignment         | Due              |  |
|--------------------|------------------|--|
| Discussion board   |                  |  |
| Activities         | Sundays 11:55 pm |  |
| Conceptual Quizzes | Sundays 11:55 pm |  |
| Data Quizzes       | Sundays 11:55 pm |  |

#### **Grading:**

Grading will be based on weekly quizzes (50% of the overall grade), activities (25% of the overall grade), and a final exam (25% of the overall grade). **Note that modules with more content have more quiz questions and are worth more points.** 

| Point range (%) | Letter<br>Grade | GPA<br>equivalent |
|-----------------|-----------------|-------------------|
| 93.0 – 100      | А               | 4                 |
| 90.0 – 92.9     | A-              | 3.67              |
| 87.0 – 89.9     | B+              | 3.33              |
| 83.0 – 86.9     | В               | 3                 |
| 80.0 - 82.9     | B-              | 2.67              |
| 77.0- 79.9      | C+              | 2.33              |
| 73.0 – 76.9     | С               | 2                 |
| 70.0 - 72.9     | C-              | 1.67              |

| 67.0-69.9   | D+ | 1.33 |
|-------------|----|------|
| 63.0- 66.9  | D  | 1    |
| 60.0 - 62.9 | D- | 0.67 |
| < 60        | Е  | 0    |

Our philosophy is that you just learn by doing, thus this course is heavily based on working with data.

\*\*\*We will drop your lowest grade for 1 quiz OR assignment (not including the final exam) \*\*\*

#### List of required and recommended materials

Textbooks (recommended):

- Gotelli NJ and AM Ellison. "A primer of ecological statistics", Second Edition. Sinauer, Sunderland, Massachusetts, USA (2013).
- Crawley, Michael J. "Statistics: an introduction using R." Wiley, (2005)

### Software (Required):

- R, freely available at <a href="http://www.r-project.org">http://www.r-project.org</a>
- A text editor, such as RStudio (http://www.rstudio.com/)

**Pre-requisites:** One undergraduate course in statistics

Class attendance: You are required to complete each module component by the due date. If you are an on-campus or REC international student, you are required to be present for the final exam. If you need to miss class due to field work or conferences, you must inform the instructor at least 2 weeks in advance.

# Attendance and Make-Up Work

Requirements for class attendance and make-up exams, assignments and other work are consistent with university policies that can be found at:

https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx.

Class participation: You are expected to participate in and class discussion boards via the internet.

#### IT help

A hardwired internet connection (not wireless) is highly recommended when working on quizzes and/or submitting assignments. If you have problems with CANVAS, you should contact:

- a) Staff in the SFRC online programs office by posting a question in the appropriate forum
- b) UF computing help desk "e-Learning Support Services" (<u>learning-support@ufl.edu</u> or (352) 392-4357 -> option 2 (Students))

These resources are also listed in the "Help!" tab on the left-hand side of Canvas.

#### **Problems with R:**

99.9% of problems with R should be solved within the discussion board. In the off chance that no one on the discussion board can solve your problem, email your T.A.

STA 6093 Introduction to Applied Statistics for Agricultural and Life Sciences (Spring 2021)

#### **Online Course Evaluation Process**

Student assessment of instruction is an important part of efforts to improve teaching and learning. At the end of the semester, students are expected to provide feedback on the quality of instruction in this course using a standard set of university and college criteria. These evaluations are conducted online at <a href="https://evaluations.ufl.edu">https://evaluations.ufl.edu</a>. Evaluations are typically open for students to complete during the last two or three weeks of the semester; students will be notified of the specific times when they are open. Summary results of these assessments are available to students at <a href="https://evaluations.ufl.edu/results">https://evaluations.ufl.edu/results</a>.

#### **Academic Honesty**

As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge: "We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity." You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment."

It is assumed that you will complete all work independently in each course unless the instructor provides explicit permission for you to collaborate on course tasks (e.g. assignments, papers, quizzes, exams). Furthermore, as part of your obligation to uphold the Honor Code, you should report any condition that facilitates academic misconduct to appropriate personnel. It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated. Violations will be reported to the Dean of Students Office for consideration of disciplinary action. For more information regarding the Student Honor Code, please see: <a href="http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code">http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code</a>.

#### **Software Use:**

All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

#### **Services for Students with Disabilities**

The Disability Resource Center coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services and mediating faculty-student disability related issues. Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation. 0001 Reid Hall, 352-392-8565, https://disability.ufl.edu/students/get-started/.

#### **Campus Helping Resources**

Each online distance learning program has a process for, and will make every attempt to resolve, student complaints within its academic and administrative departments at the program level. See <a href="http://distance.ufl.edu/studentcomplaints">http://distance.ufl.edu/studentcomplaints</a> for more details.

Students experiencing crises or personal problems that interfere with their general well-being are encouraged to utilize the university's counseling resources. The Counseling & Wellness Center provides confidential counseling services at no cost for currently enrolled students. Resources are available on STA 6093 Introduction to Applied Statistics for Agricultural and Life Sciences (Spring 2021)

campus for students having personal problems or lacking clear career or academic goals, which interfere with their academic performance.
