As the world becomes globalized, today’s companies expect to hire graduates who can be effective in a global environment. In this course, students will learn about the different aspects and examples of cultural similarities and differences in a personal and professional setting, as well as the theories of intercultural communication and how to apply them in real world situations. Students will also learn about Irish culture and history from local experts and be able to develop an appreciation for the culture of their host country. Students may be placed in either Dublin or Galway, depending on the best internship placement for their field of study. On the ground support and cultural activities will be provided for students in both locations.

Blending a high-energy, multinational professional culture with traditional Irish warmth and hospitality, Dublin has sprawling parks, quirky restaurants, and music and theatre by night. Dublin is not just a vibrant capital city - it’s an international centre of excellence for business, culture, and the arts. Galway is best known for its brightly colored cafes and pubs, eclectic street performers, and closeness to the famous Cliffs of Moher. In Galway, history and modernity unite to create an ideal environment for discovering Ireland’s culture, language, and people.

Students will stay in homestays with twin rooms with shared bathrooms. Breakfast and dinner will be provided.
